

Dr. Christopher Ahmad performs a live surgical shoulder labral repair at 2013 AOSSM Annual Attendings Meeting

At the 2013 AOSSM Annual Meeting, Dr. Christopher Ahmad performs a live surgical shoulder labral repair at a surgical workshop designed for practicing orthopedic surgeons, physicians and allied health professionals in the field of sports medicine or related fields of practice.

Upon completion of this Live Surgical Demonstration Workshop, learners are able to:

- Evaluate the optimal use of diverse techniques for the six upper extremity procedures
- Formulate surgical protocols for the upper extremity procedures that integrate strategies designed to avoid potential complications
